Task:

Write a code in c language to generate electricity bill.

Conditions:

- For first 50 units – Rs. 3.50/unit
- For next 100 units – Rs. 4.00/unit
- For next 100 units – Rs. 5.20/unit
- For units above 250 – Rs. 6.50/unit
- You can use conditional statements.

Code:

```
#include<stdio.h>
int main()
{
    float bill, units;

    printf("Enter the units consumed=");
    scanf_s("%f", &units);

    if (units <= 50 && units >= 0)
    {
        bill = units * 3.50;
        printf("Electricity Bill=%f Rupees", bill);
    }
    else if (units <= 100 && units > 50)
    {
        bill = 50 * 3.50 + (units - 50) * 4;
        printf("Electricity Bill=%f Rupees", bill);
    }
    else if (units <= 250 && units > 150)
    {
        bill = 50 * 3.50 + 100 * 4 + (units - 150) * 5.20;
        printf("Electricity Bill=%f Rupees", bill);
    }

    else if (units > 250)
    {
        bill = 50 * 3.50 + 100 * 4 + 100 * 5.20 + (units - 250) * 6.50;
        printf("Electricity Bill=%f Rupees", bill);
    }
    else
    {
        printf("Please enter valid consumed units...");
    }
    return 0;
}
```

}

Output:

A screenshot of the Microsoft Visual Studio Debug Console window. The window has a title bar with the text "Microsoft Visual Studio Debug Console" and standard window controls (minimize, maximize, close). The console area is black with white text. The output text is as follows:

```
Enter the units consumed=200
Electricity Bill=835.000000 Rupees
C:\Users\EliteBook\source\repos\ConsoleApplication9\x64\Debug\ConsoleApplication9.exe (process 1088) exited with code 0.
Press any key to close this window . . .
```
